ATTN: Mr. D. Wayne Hedberg

RE: Continental Lime, Inc. (CLI) Cricket Mountain Project (CLI) M/027/006 (SRK Project #57705)—  
Meeting at UDOGM, March 12, 1997

Dear Mr. Hedberg:

As agreed upon in the March 12, 1997 meeting between UDOGM, CLI and SRK, I am submitting this letter to the Division to provide written documentation relative to issues discussed and subsequently agreed upon in the March 12, 1997 meeting at the UDOGM office in Salt Lake City, Utah.

Present at the meeting: Tom Munson (UDOGM), Tony Gallegos (UDOGM), Mike Brown (CLI), Tony Panchyshyn (CLI), Steve Herron (SRK), Sandy Wise (CLI), D. Wanye Hedberg (UDOGM), Bob Robison (CLI), Vic Kastner (CLI), Jeff Parshley (SRK), and Lynn Kunzler (UDOGM).

The following list of topics were agreed upon by CLI and UDOGM

- 1) CLI will submit the February 25, 1997 letter from BLM which lists the BLM concerns relative to the Environmental Assessment.
- 2) CLI will inventory the old "postage stamp" test plots to determine the revegetation success.
- 3) CLI commits to redesign the test plot program by March 26, 1997.
- 4) UDOGM will allow CLI to alter the seed mix depending upon success of the seeds on the test plots, availability and economics.
- 5) UDOGM will allow CLI to use 2-3 tons/acre of manure on test plots.
- 6) CLI will eliminate the use of straw on test plots.
- 7) UDOGM approves the present proposed seed mix with the addition of 1/10 pound/acre (PLS) Scarlet Globemallow and 1/4 pound/acre (PLS) Utah Penstemon.
- 8) UDOGM does not expect CLI to achieve the 70% revegetation standard; however, CLI must provide data from test plots to provide the upper limit for expected revegetation success.
- 9) UDOGM will allow the modification of soil amendments pending results from the revegetation test plots.
- 10) CLI will submit to the Division, by March 26, 1997, a brief description relative to the completion data, geology and location of the water well.

Michael R. Brown to D. Wayne Hedberg  
Continental Lime Inc & UDOGM  
Meeting of March 12, 1997

- 20) CLI will provide the Division with a brief description of the fines piles and the potential to impound water.
- 21) CLI will place seed with no growth amendments on angle of repose waste rock dumps.
- 22) CLI will place seed with growth amendments on the angle of repose fines piles.
- 23) UDOGM will not require CLI to borrow or import soil.
- 24) CLI will not haul fines for growth media purposes into the proposed expansion area.
- 25) CLI will amend Drawing 5-1 to include areas that will be left as bare rock.
- 26) CLI commits to amend Drawing 5-1 to include the original Poison Mountain Project area(s).
- 27) CLI and UDOGM agree that the BB Dolomite fines pile is not a reclamation issue.
- 28) This meeting occurred on March 12, 1997 in Salt Lake City, Utah between CLI, SRK, and UDOGM. The meeting began at 1005 hours and terminated at 1223 hours. The aforementioned attendees were present for the duration of the meeting less D. Wayne Hedberg who retired from the proceedings at 1105 hours.

This document is intended to serve as an official record of agreements made by CLI, SRK, and UDOGM. If the Division has any comments per this document, please contact me at your earliest convenience.

Very truly yours,

Michael R. Brown, P.G.  
Environmental Manager
